

Bookshelf Platform — Architecture (AWS / Assessment)

Multi-env Terraform · EKS + Istio mesh · S3/CloudFront · GitOps · Observability · Private API via SSM bastion

Assessment coverage & access runbook

1. Infra: Terraform modules (network/eks/rds/s3/cloudfront/bastion) + live/dev|stage|prod
2. Apps: Helm umbrella + Istio Gateway/VS + STRICT mTLS + retries/circuit breaking
3. Static: S3 + CloudFront caching (outside cluster)
4. CI/CD: GHA → ECR; Argo CD Applications for GitOps
5. Governance/obs: Trivy, Prometheus, Grafana, Loki, OTel auto-instrumentation, Kiali
6. State: S3 backend + use_lockfile (no DynamoDB)

Private EKS access:

- A) terragrunt apply (bastion + eks_endpoint_public_access=false)
- B) ./scripts/eks-port-forward-dev.sh 8443 # keep terminal open
- C) Second terminal: kubectl via https://localhost:8443 (see script banner)
